WHOSE HEAD??

1.	Skull broader in dogs. Median groove on forehead. Stop extremely slight. Muzzle long & powerful, appearing almost angular with bridge of nose straight, often slightly arched, never concave.
2.	Skull broad with defined stop; clean cut without fleshy cheeks. Jaws of medium length, powerful not snipey. Nose wide, nostrils well developed.
3.	Head, long and nicely moulded. Skull, flat and moderately broad with a slight stop between eyes. Nose of good size, with open nostrils. Jaws long and strong.
4.	Head wedge-shaped in both side and front profiles, in proportion to body size. Slight stop. Foreface and skull equal length. Planes of skull and muzzle parallel.
5.	Balanced and well-chiselled, skull broad without coarseness. Muzzle powerful, wide and deep. Stop well defined. Length of foreface equals stop to occiput. Nose preferably black.
6.	Skull moderately wide and slightly domed. Slightly pronounced groove on forehead. Moderate stop Muzzle blunt, not pointed, with bridge of nose straight. Jaws and cheeks strong, well-muscled.
7.	Skull of medium breadth, stop well defined and occipital bone pronounced. Muzzle somewhat concave giving a slightly dish-faced appearance. Well-developed soft lip.
8.	From above trapezoidal in shape and moderately broad. Skull should be longer than muzzle. Stop not too pronounced but evident. Muzzle slightly wedge shaped with rather blunt profile.
9.	Head planes in profile are divergent. Lean skull of oval shape. Well-pronounced occiput. Well defined median furrow. Muzzle of good depth. Nose large, spongy in appearance.
10.	Skull moderately wide, flatly rounded. Stop moderately developed. Muzzle long, broad, deep and strong; nasal bridge shows slight curvature above the straight line, more prominent in males.
